

SOLIDARITY FUND

SYSTEMIC AND COMMUNITY-BASED ORGANISATION GRANTS

In February 2021, the Solidarity Fund's Selection and Evaluation Panel approved systemic and community-based organisation grants as part of its GBV II initiative. This large-scale, national response to the challenge of GBV in the country – with total funding of R75 million – falls within the Fund's broader humanitarian initiatives.

COMMUNITY-BASED ORGANISATION (CBO) APPROVALS

The vast majority of services related to GBV are delivered at community-level, often by small community-based organisations (CBOs). The call for applications for community-based responses intended to provide resources to organisations working at community level to respond to GBV in **three main focus areas**: prevention, response, and access to justice.

The Selection and Evaluation Panel approved 321 applications under this call, with all provinces represented in the approvals.

SYSTEMIC APPROVALS

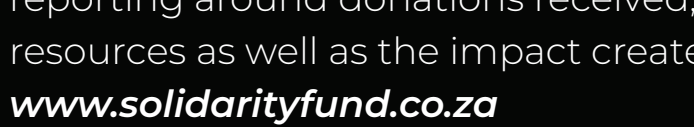

The Fund's primary role – is to be the activities it supports in health, behaviour change and humanitarian – is to be an emergency response vehicle during the Covid-19 pandemic. However, where possible, the Fund also wishes to make catalytic and/or systemic investments that will have meaningful, lasting impact well beyond the crisis (and the Fund's existence). For this reason, the Fund opened a call for applications for non-profit organisations that could demonstrate how a once-off grant from the Fund would help catalyse or accelerate large-scale or systemic change in the GBV space.

The Selection and Evaluation Panel approved 11 applications as part of this call. The successful applicants are based in three provinces, but all provinces will be covered in implementation.
